

International Chemical Company Signatories of the Declaration of Support to the Responsible Care® Global Charter

Listed below are the international companies and their CEOs who have given their support to the Responsible Care® Global Charter, developed by the International Council of Chemical Associations (ICCA). This list continues to grow as the Charter is promoted by the 53 chemical manufacturers' associations around the world running Responsible Care programs. The list includes those 145 companies whose letters of support have been received by 3 November 2008.

Companies and businesses that are members of national Responsible Care programmes will also sign up to the Charter as a matter of course through their commitment to the initiative.
